

Zimbra Drive

Enterprise-Level File Sharing
Built into Zimbra 8.8.12+

At A Glance

Zimbra Collaboration, already used and trusted by 100s of millions of users worldwide, now includes Zimbra Drive — **out-of-the-box, enterprise-level file sharing functionality built into Zimbra.**

How do your employees share sensitive information?

With the rising popularity of cloud-based services and the use of personal devices, your confidential data may be out of your control, putting you at risk of data leakage and violation of privacy policies.

Where is your company's data? Is it secure? In your own country?

Zimbra Drive provides your users with a single, secure access point for data, and that data is stored on your servers to meet your data sovereignty, security and privacy requirements.

KEY BENEFITS

- **Data resides in your private cloud / mail servers**
- **Data is managed by your IT department**
- **Data sovereignty for peace of mind**
- **Built into the intuitive Zimbra Web Client interface**
- **Back up with popular storage options like AWS**

- **Integrated with Zimbra Docs**
- **Upload, manage and edit files**
- **Share files for true, realtime collaboration**
- **Mark files as preferred for quick access**
- **Add custom notes or descriptions to files**
- **Quick, stateful navigation**
