

LEARNING SUMMIT 2024

21-22/11/2024 | Livestream

L'événement propose des sessions en Français et en Anglais

The event has sessions in French and English

PROGRAM
PROGRAMME

FRENCH

Sous le thème "**Apprentissage sur mesure pour les natifs du numérique**", nous ne nous contentons pas de discuter d'éducation et d'apprentissage immersif ; nous façonnons un avenir meilleur pour les enfants et les jeunes employés, garantissant ainsi la prospérité des sociétés. Il est important de reconnaître que la nouvelle génération est composée d'apprenants uniques, enrichis par des connaissances diverses et informelles acquises en dehors du cadre scolaire. De plus, à mesure que de plus en plus de jeunes rejoignent le monde du travail, celui-ci intègre désormais plusieurs générations travaillant côte à côte.

Ce sommet est spécialement conçu pour les leaders en Formation & Développement (L&D), Ressources Humaines (RH), Conception pédagogique, Développement de contenu eLearning et formateurs, ainsi que pour la formation virtuelle. Nous invitons les leaders en L&D, les éducateurs et les professionnels de l'éducation et de l'industrie de la formation à nous rejoindre pour exploiter le potentiel des technologies 3D immersives et de l'IA. Ensemble, nous pouvons créer des expériences éducatives transformatrices qui répondent aux attentes de la nouvelle génération.

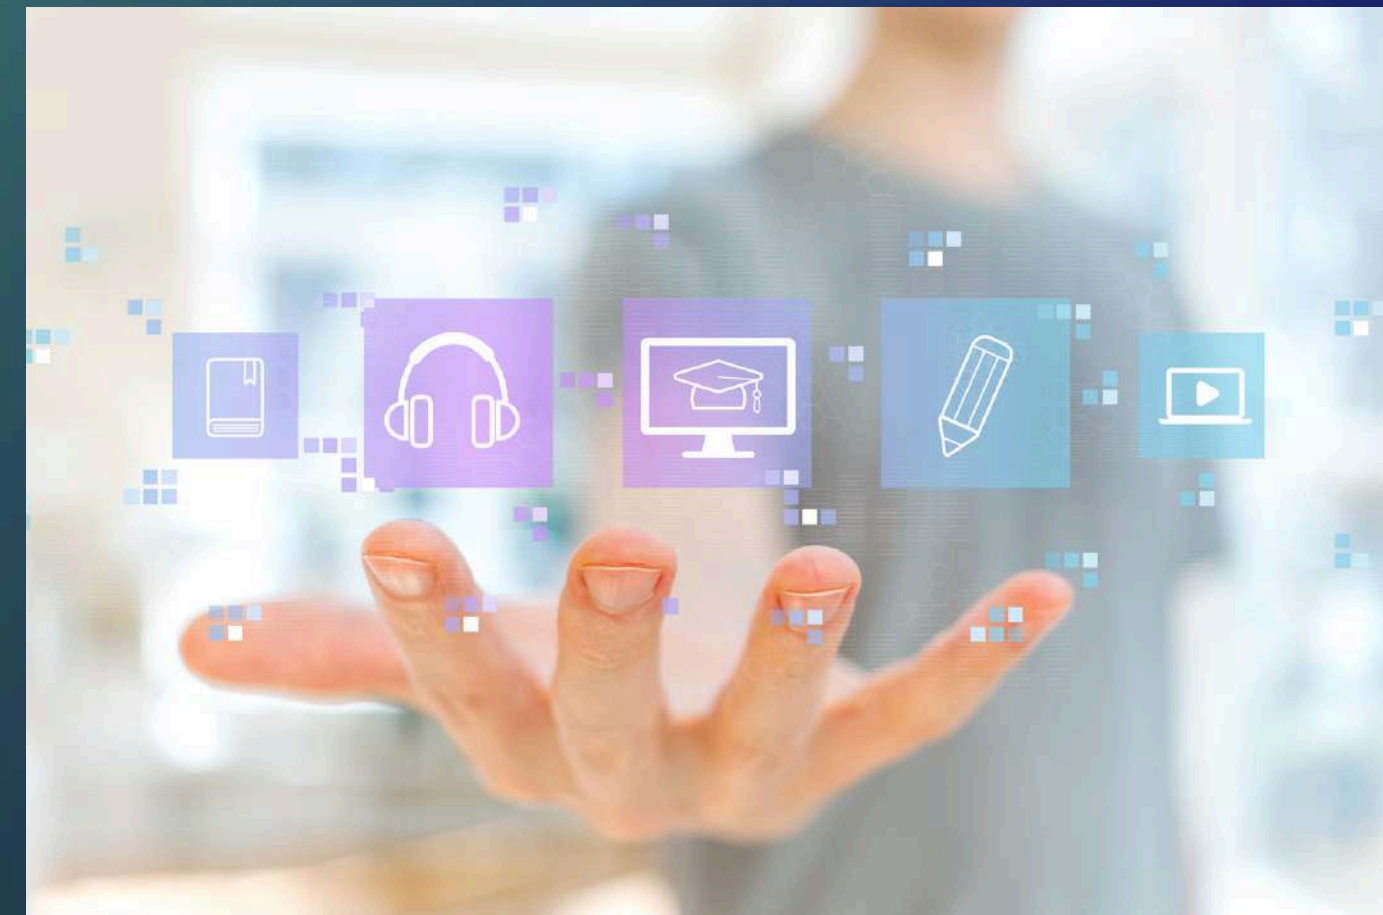

ENGLISH

Under the theme "**Tailored Learning for Digital Native**," we are not just discussing education and immersive learning; we are shaping a better future for children and young employees, ensuring the prosperity of societies. We recognize that the new generation are unique learners, enriched with diverse extracurricular and informal knowledge. In addition, as more young individuals join the workforce, the workplace now integrates multiple generations working side by side.

This Summit is tailored for leaders in L&D, HR, Instructional Design, eLearning Content Development & Trainers, and Virtual Training. We invite L&D leaders, educators, and learning industry professionals to join us in harnessing the potential of immersive technologies and AI. Together, we can create transformative educational experiences that meet the expectations of the new generation.
